Introduction

California is all about appearance, health, and longevity. This is why celebrities are flocking to Beverly Hills Vitamin Therapy. Our specially formulated infusions help promote all aspects of wellness and beauty. Come on in and find out why we have taken Hollywood by storm! While in the Maldives, enjoy and rejuvenate at the luxurious Drift Spa while receiving another spa treatment, or in the comfort of your own Villa. Also, ask about our IV packages.

What is VitaminTherapy?

Most people are deficient in much-needed vitamins and minerals. Everyone thinks they can correct this with multivitamins. Doing so will only help partly. Vitamin Therapy replaces the missing nutrients, minerals, and vitamins. Our treatments deliver large amounts of nutrients directly-where they belong. Our menu includes a wellness approach for your busy life. Many guests who have had this treatment find that, within hours of the treatment, they have more energy, their immune systems are boosted, and they have a greater sense of well-being. Also, nutritional therapy slows many of the effects of aging. This therapy is safe and has few if any, side effects. Leave Beverly Hills feeling rejuvenated. Vitamin Therapy is intended to rejuvenate and support wellness within healthy individuals and promoting enhanced performance, energy, and well-being.

A man is surfing a large, powerful wave. The water is a vibrant blue, and the sun is low in the sky, creating a golden glow on the right side of the image. The surfer is in a crouched position, looking towards the camera. Several callout boxes with lines pointing to different parts of the surfer's body and the wave are overlaid on the image. The boxes contain the text 'Alertness', 'Endurance', 'Hydration', and 'Rejuvenates Damaged Skin'. The overall image conveys a sense of vitality and physical performance.

What Are the Benefits of Vitamin Therapy?

In most cultures today, people push their bodies to the absolute limit. IV Therapy is crucial in addressing deficiencies at the cellular level. Unlike vitamins and minerals absorption via the digestive system, with IV Therapy, there's no need to wait for our formulations to work because they are delivered directly to the bloodstream and are effective immediately.

What Does Vitamin Therapy Treat?

Vitamin Therapy is a safe and effective treatment for combating modern-day stressors and fatigue. It is the hottest pathway to wellness today.

FAQ's

How does Vitamin Therapy work?

Vitamin Therapy is a procedure that uses an intravenous drip to infuse essential vitamins, minerals, and amino acids directly into the body. The advantage of this is that higher levels of nutrients can often be introduced into the body (at 100% absorption rate) than would be possible if taken orally (which is usually 10% – 30%).

How often should I get Vitamin Therapy?

How often, or at what intervals, you should get intravenous therapy depends on the specific type of treatment you are getting as each patient's treatment is individually customized. Our wellness Doctor at Niyama can create a wellness package for you.

Will it hurt?

Most people barely feel the IV placement, and many don't feel it at all. A specialized nurse or doctor will place a small IV after pre-treating the skin with a very cold "freeze" spray called "Pain Ease" to minimize discomfort.

What can I expect during my treatment?

Most of the IV drips take anywhere between 20-45 minutes during which time a patient can combine another spa treatment, read a book, listen to music, watch a movie, or just relax in the comfort of your own Villa. Once the Vitamin Therapy procedure has started, you will be reclined in a comfortable chair as the drip is administered.

REVIEWS

 "I was feeling very tired, and with no energy at all. I had heard about people getting IV treatments, but I wasn't expecting much from it. Got my IV in the comfort of my own home, and I was amazed by the results! My skin cleared up, and it gave me an amazing glow. I felt way more energized through the day, and improved my sleep quality considerably. Would recommend 100%" - Daniella L.
